

Product Range

Anti-Microbial / Anti-Fungal (O) Additive

Unique Additive based on Organic micro particles and other additives

Imparts excellent bacterial and fungal-controlling properties on polymer surfaces

Life Guard Additive

Based on micro particles of modified zeolite

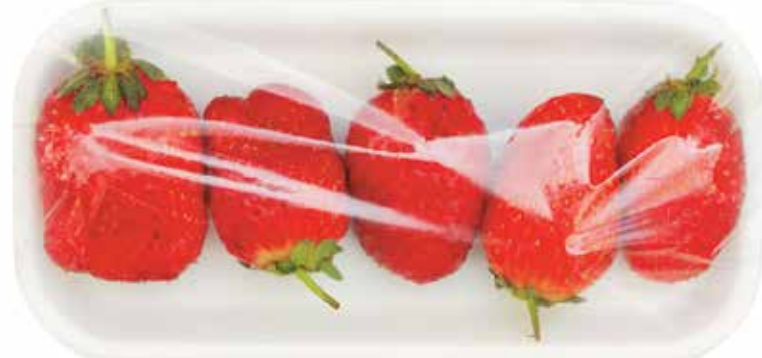

Increases the shelf & transit life of packed fruits, vegetables, cut flowers & meat by reducing ethylene concentration

Freshness Plus Additive

Unique Additive based on Silver coated micro particles.

Increases the shelf and transit life of packed fruits, vegetables, cut flowers and meat by controlling ethylene concentration.

Anti-Fog (Cold & Hot) Additive

Prevents fogging of film surfaces at low & high temperature and during storage

Maintains the visibility of packaged food items

Anti-Algae, Anti-Fouling Additive

Unique Additive based on mixture of low grade biocides, fungicides & algaecides

Imparts antimicrobial/ antifungal/ antialgae/ antifouling properties on polymer surface.

Anti-Microbial / Anti-Fungal (S) Additive

One of its kind Additive based on Nano-Silver

Imparts anti-microbial, anti fungal properties on the polymer surfaces

Rodent Repellent Additive
 Unique Additive based on mixture of odour emitting chemicals and very bitter compounds
 Dissuades rodents from attacking polymers

Anti-Microbial, Anti-Fungal (F) Additive
 Additive based on organic bacteria & fungus controlling micro particles.
 Specially developed additive for protecting door gaskets from fungal attack

Anti Static Additive
 Additive based on poly-functional hydrophilic polymer
 Makes the surfaces hydrophilic which reduces static charge accumulation on the surface

Ant Cum Termite Repellent Additive
 Unique Additive based on mixture of odour emitting chemicals and very bitter compounds
 Dissuades ants and termites from attacking polymers

Oxobiodegradable Additive
 One of its kind Additive based on Transition Metal Salts
 Initiates degradation of plastics in the presence of UV/sunlight and oxygen

Vapour Corrosion Inhibitor Additive
 Unique Additive based on amines
 Prevents surface corrosion of packed components

Transparent Colours
 Unique technology to convert existing proven pigments into Nano pigments which are Transparent, Light fast and Heat stable with High tinctorial strength

Insect Repellent Additive
 Unique Additive based on plant oils & odoriferous compounds
 Protects the plant from insect attack in pre & post harvest condition

Company Profile

Lifeline Technologies was established in 1993 with a mission to *manufacture innovative, and specialty products of global standard. Our promise is to deliver performance and value addition to our business partners.*

Our niche products are divided in 4 different product categories based on the end use. One of the four categories is - *Specialty Plastic Additives.*

The range consists of 14 unique *Specialty Additives.* All the products are novel in one or many ways. These additives are solutions to a problem faced by the processor. *Functionality & Competitive Pricing* make our products unique!

Lifeline Technologies exports to many countries including Canada, UK, Spain, Lithuania, Portugal, South Africa, Kenya, Thailand, Malaysia, Korea, UAE, Turkey and Bangladesh.

Also Available as Master Batches
