Technical Data Sheet

NWK-742

Summary

NWK-742 is modified silane-silicate with excellent of weatherproof, anti-abrasion and anti-solvent. And also there is no migration effect with self-emulsifier without use of surfactant.

Product Features

Strong Chemical Resistance

Excellent of adhesion with special synthesis and bonding with isocyanate.

Excellent of anti-scratching, water resistance, weatherproof and cold tolerance.

Excellent of anti-solvent for steel plate, G/L, EGI, GI

Good of corrosion , acidity and alkalinity resistance.

Harmless to humans and no environmental pollution

No dangerous fire and explosion

Physical properties

	Description	NWK 742
1	Appearance	Milky liquid
2	Solid Content	33~35%
3	Viscosity(CPS/25°C)	Max 100
4	PH	9 – 10

Usage

For PVC, Plastic and coating of metal material surface

For wood and furniture. For exterior building construction, Ink Vehicles

For parking lot and factory's flooring agent etc.

For roof coating

Package

▷ 200kg Plastic drum, 1mt tote

Remark

- . Must always be kept tightly closed and storage above 5 °C ,
- . Splashes and spills must be immediately removed with water.
- . The tools must be cleaned with water immediately after use.
